

Hahnemann's Medical Literature

SAMUEL HAHNEMANN

1755-1843

Founder of Homeopathy

"Hahnemann's searches of the medical literature were not primarily conducted to obtain theoretical ideas and to back-up his own evolving medical views, but as a crucial means by which he could trawler the medical past and present for detailed case reports concerning diseases and drugs and their various specific effects on the human organism, as well as interactions between them, cases of poisoning and cures of all types. Literary work thus provided him with a precious clinical activities of hundreds of fellow physicians scattered through time, the cumulative experiences of whom Hahnemann's could draw on to fertilize his growing views about drugs and diseases. Through cunning use of this approach, he was soon able to distill down a huge mass of material into a few basic principles governing the actions of diseases and druges, which methods work and which do not. In brief, this was his 'big idea,' and was his true mission of life."

Samuel Hahnemann

Hahnemann's favourite Old Dresden City

PRESIDENT DESK

Dr. Tarak Prasad Chatterjee
(Ex. H.O.D., M.H.M.C. &H)

Purusottam Homoeo Bikash Laboratory is the brain child of Dr. Tarak Prasad Chatterjee, the Ex-H.O.D. of Obstetrics & Gynecology Department of Medinipur Homoeopathic Medical College & Hospital, Govt. of West Bengal, India; Exmember of Board of Studies, Calcutta University & the ex-president of Kharagpur Homoeopathic Medical College & Hospital who was inspired by the annotation "Every physician should prepare his own medicine" made by founder of homoeopathy, respected C.F.S. Hahnemann with this identify after overcoming all the odds the pioneer of P.H.B.L, had finally achieve his dream and established P.H.B.L. Group throughout the India in 2003.

The aim of the pioneer was to manufacture the medicine in a natural environment with maintaining the purity for the preparation of a safe medicine with faith so that all the followers and doctors of homoeopathy can use these medicines. PHBL has passed near about 13 years in the field of Homoeopathic manufacturing. It is marching towards demanding future with many distributors & dealers all over India. This company has achieved G.M.P. HACCP & ISO 9001 : 200 from the respective authorities for maintaining best quality. Our testimonials are attached at the end of this book.

Founder Chairman (Dr. Tarak Prasad Chatterjee)
Purusottam Homoeo Bikash Laboratory

RAW MATERIALS

Aloevera

Family : Liliaceae
Habitant : Asia, India
Source : Our own cultivation

Abroma Augusta

Family : Sterculiaceae
Habitant : Asia, India
Source : Our own cultivation

Herbal Garden :

- ◆ Procured from original source from reliable vendors / Importer / our own source.
- ◆ All herbs undergo strict testing as per HPI and accepted after QC approval.
- ◆ All crude drugs are taken pass through strict QC analysis and approval through Microscopical, Microscopical TLC, UV Spectrophotometry & Refractometry

Grain Based ENA .:

- ◆ We use grain base Extra Natural Alcohol for better quality medicine.
We are also a Bonded Unit of Govt. of W.B. under Excise Dept.

Our own herbal garden

We use grain base E.N.A.

RAW MATERIALS

Family : Piperaceae
Habitant : Asia, India

Family : Palmaceae
Habitant : USA

Family : Apocynaceae
Habitant : USA, Canada

Family : Passifloraceae
Habitant : USA, Asia, India

Some accepted Herbs shown as sample

QUALITY MANAGEMENT

Macroscopically Evaluation By means of five sense organ viz. visual, smell, taste, cracking noise, touch and consistency of the purchased raw materials.

Cross Matched : The purchased raw materials are crossed matched with the previously collected tasted samples. If it is matched with the previous samples, it sent to the analytical section for future fine examination, Otherwise, it sent to the concerned suppliers.

I) Microscopically

II) Chemical Test

III) Thin Layer chromatography

The passed raw materials processed through the mechanized ways by which maceration, percolation and mixing are taken place. The passed raw materials are grinded by an electrical grinder. The essence of the raw materials is extracted by applying the alcohol & distilled water in order to prepare mother tincture. This process is followed by the guidelines prescribed in Homoeopathic Pharmacopoeia in India (HPI) & Pharmacopoeia of United States for few drugs. Then the macerated raw material is stored for minimum 21 days in a cool & dark place. The macerated raw material is stirred every day for at least 21 days for proper extraction. After this period it is pressed out by a tincture press. Then it is ready for filtration process manually as well as mechanically for at least 2 to 5 time. During this process it is observed that the amount of sedimentation. If it is under threshold level than the Mother tincture is send for bottling & packaging. If the result crosses the threshold level of sedimentation, then it is sent for further filtration process. The final process is bottling, labelling & packing. The entire procedure of manufacturing is maintained according to GMP norms & through Standard operating procedure (SOP) prescribed in HPI.

PHBL is purchasing back potency from standardized & reputed supplier for manufacturing dilution. The ratio of mixing of Backk potency & alcohol is 1: 99. followed by 10 downward stroke. This process is followed by the guidelines of HPI. The final process is labelling & packing of dilution, SOP is maintained in every steps of prepartion of dilution

The major raw material of combination is mother tincture & others are alcohol, caramel, liquid glucose, maltose, sugar & essence. The prescribed amounts of this are taken in a stainless steel vat of 304 grades & by an industrial stirrer following a simple stirring process. Then the mixture is under gone by filtration process by a sparkler's filter. The final step is bottling, labelling & packing is done by fully automatic machineries.

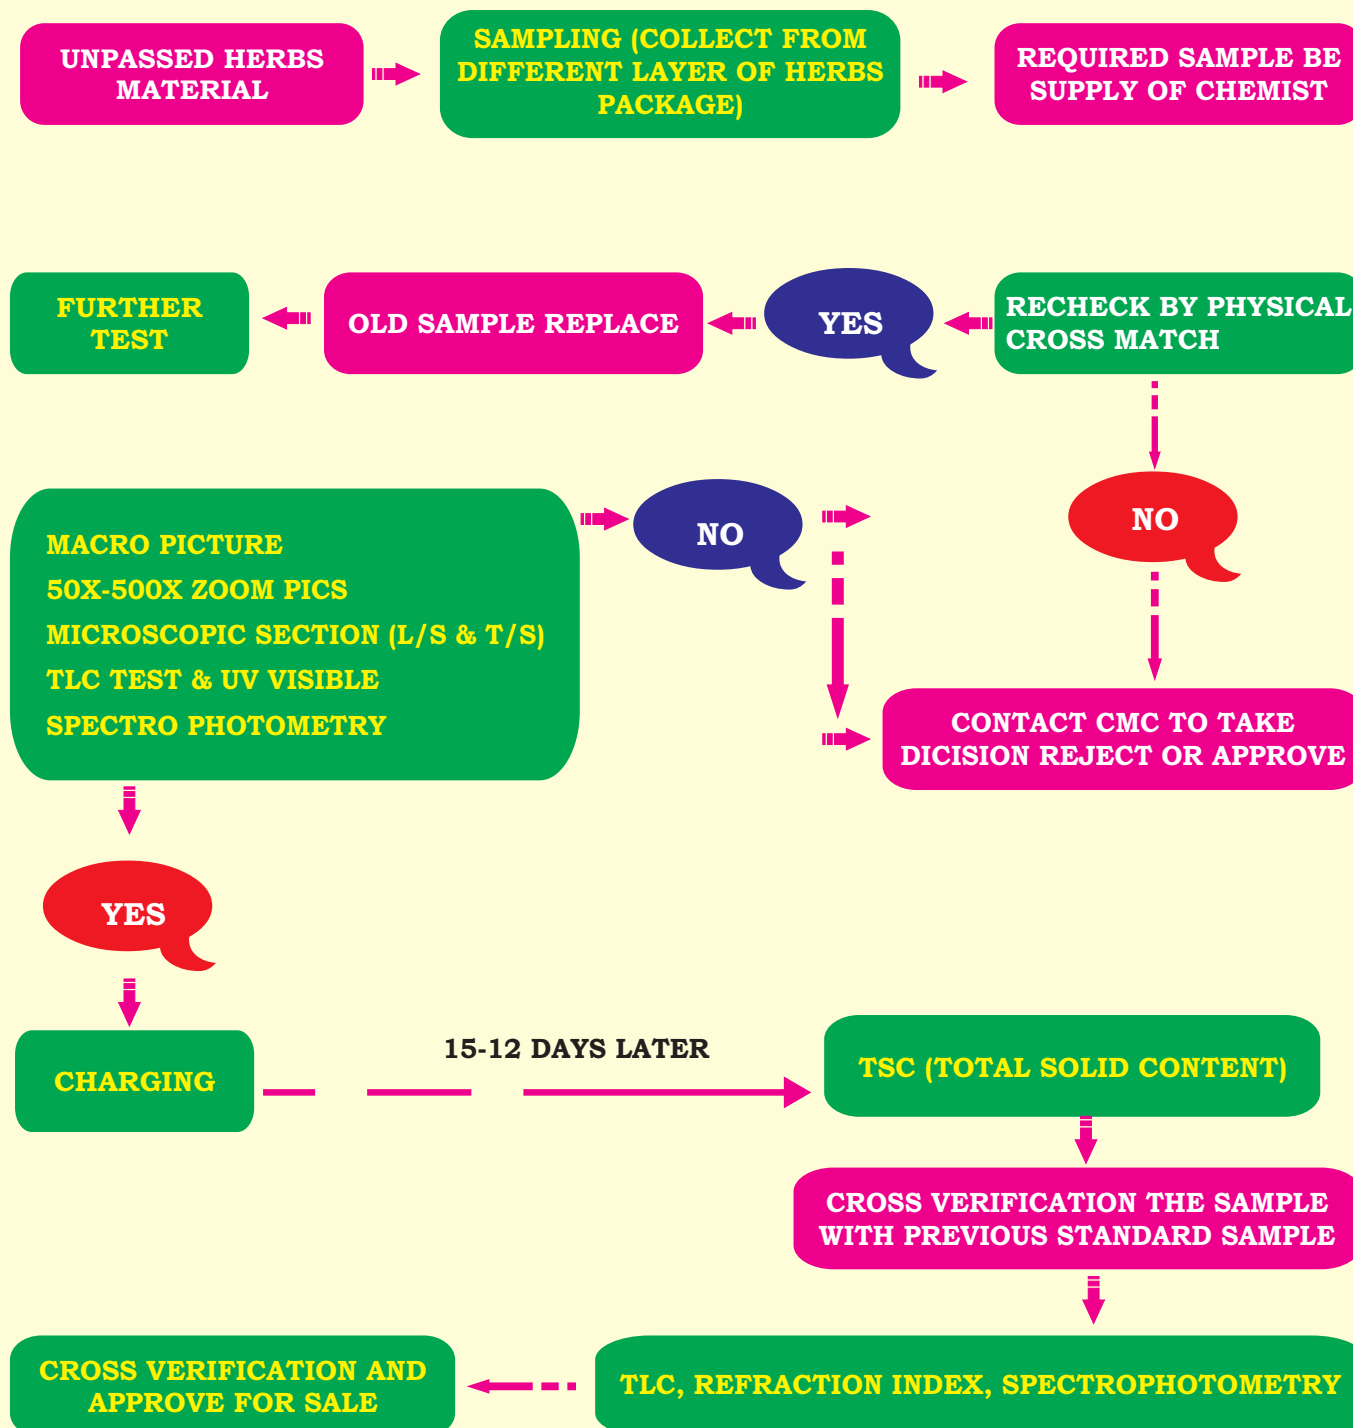

SOP is maintained in every step of homoeopathic medicines manufacturing. All the equipments used in the manufacturing process & the layout of the manufacturing units are being followed by GOOD MANUFACTURING PRACTICE (GMP) norms. We have arranged our automatic machineries to complete our production 20000 pcs per 8 hour.

PURUSOTTAM HOMOEOPATHIC BIKASH LABORATORY (BONDED)

QUALITY POLICY

**Managing Partner
(Dr. Trinath Chatterjee)
B.Sc. BHMS**

PHBL is manufacturing and marketing homoeopathic drugs and medicines with its operation centre at Paschim Medinipur. While doing so we admit our commitments towards.

- Implement quality management system covering all our products and services confirming the requirement of ISO 9001:2008, GMP & HACCP.
- Complying with all legal and other requirements relating to our business.
- Set time bound quality objectives with targets and meet them through time bound management program.
- Continually enhance competence of the work force and overall Performance of the organization.

This quality policy will be given wide publicity and communicated to all the employees and distributed to the external people on demand. This is issued with the approval of the competent authority. The policy will be reviewed for its continuing suitability, relevance and adequacy.
